

Title: **SYSTEMS AND METHODS FOR DISTRIBUTING INFORMATION TO
AN OPERATOR OF A VEHICLE**

ABSTRACT OF THE DISCLOSURE

Systems and methods are provided to facilitate a distribution of information. According to one embodiment, vehicle control information is determined, the vehicle control information being dependent on time in formation, operator information, and/or vehicle information. For example, an intersection control signal may be determined. The
5 vehicle control information is then transmitted to an automobile device, which in turn arranges for the vehicle control information to be provided to an operator. For example, a graphical representation of an intersection control signal may be displayed on an automobile's windshield.
